

# Stop the Wrongful Removal and Deportation of Children!

**Ollie is an adorable, playful young boy raised by his beautiful mum, Shannon. The Australian Family Law Court failed to protect this mother-son duo and forced Ollie\* an Australian Citizen, to return to the communist country he was born in as a ward of a foreign court.**

Shannon, was the sole custodial parent, and both she and her son were resident on Australian Soil when this communist court decided that because Shannon was a single mother, they should have control of her son. As stated in that court's reasons for judgement because Shannon was single regardless that the child can never be a citizen of that country she should have applied for permission to take her Australian Citizen son to Australiza. There were no allegations of Abuse ever, and Shannon's parenting was never in doubt irregardless this child was made a ward of a communist court and ordered to be returned.

The mother did not even have a visa anymore, and her son was enrolled and attending school. 2 years later, the Australian Family Law Courts upheld these foreign orders made outside of any international treaty. They ordered the return of Ollie to this country. Mum has only been granted a 3 month tourist visa.

With this judgement a precedent has been set. We are asking that you would please sign this petition to put before our Prime Minister and the Attorney General to help Ollie and other's like him from being removed from their homes and their parents. We are asking that our Government let women know about the danger of giving birth in a foreign country.
